REASON FOR END OF LIFE

► Introduced in 2002, PRAESIDEO is on the market now for 20 years and is used in many prestigious projects all over the world. However, several components have become obsolete and others are increasingly difficult to find – a situation that is intensified by the current global component supply crisis.

► In 2020 the state-of-the-art PRAESENSA Public Address and Voice Alarm system was launched as the successor of PRAESIDEO. In addition, the proven and trusted PAVIRO system can provide an excellent alternative for medium-sized applications.

► Based on component stock and committed deliveries of components and subassemblies, we can still produce PRAESIDEO products this year in restricted quantities. For ongoing projects, please contact your local Bosch representative to discuss possibilities.

NOTES

► **Because of the limited availability of PRAESIDEO, it is highly recommended to use PRAESENSA instead.**
